## FRONT END DEVELOPER

## OBJECTIVE

I have extensive experience in front-end development, particularly with React, Material-UI (MUI), and testing. I specialize in building dynamic and responsive user interfaces using React, leveraging Material-UI to create visually consistent and professional designs. My expertise includes writing and maintaining comprehensive unit tests to ensure the reliability and performance of the applications I develop. This combination of skills allows me to deliver high-quality, user-friendly web applications that meet both aesthetic and functional requirements.

## WORK EXPERIENCE

### Front End - Fresher - Full-Time

7/2023 - 6/2024

#### DXC Technology VIETNAM

Project OCBC Bank : OCBC Bank is a project that interacts between staff and customers with the payment services that the bank provides

#### Responsibility

- Building the interface for OCBC Bank is a project focused on interaction between users and customers. It is a large project with multiple teams involved. Our team, consisting of 30 members, is focused on building a visually intuitive and user-friendly interface, while also performing unit tests to ensure the stability and performance of the system.
- Handling user events is a critical part of the project. We have developed flexible event handling mechanisms, ranging from simple button clicks to complex interactions. This ensures that our interface responds promptly and meets the full requirements of users and customers. These events will be implemented by other groups to interact with the database.

#### Technologies

- REACTJS , SCSS , MUI , JEST , REACT TESTING
